

Safety information for Rainbow Socks® Products

1. Rainbow Socks® are designed for personal use or as ready-to-gift products. There are no age or gender restrictions.
2. Some gift socks products may contain small parts and are therefore not suitable for children under 3 years old or should be opened in the presence of an adult.
3. The exact composition of each product is listed in its product description.
4. Rainbow Socks® are skin-safe, hypoallergenic, and made from certified materials (OEKO-TEX).
5. Due to the properties of combed cotton, the socks may shrink when exposed to high temperatures. It is recommended to wash them at a maximum of 30°C. If the socks change size after washing, stretch them by hand to restore their original shape.
6. To maintain their colour, socks should be washed inside out with similar-coloured garments.
7. Depending on the product, the packaging is made of cardboard, plastic, or metal and often forms an integral part of the product. After unpacking, dispose of unnecessary elements responsibly in line with environmental standards (waste segregation).
8. Products requiring self-assembly or featuring games (e.g., Sudoku) include instructions either inside the packaging or printed directly on it.
9. For tagged products, cut the label with scissors. Tearing it off may cause mechanical damage to the socks, leading to tears near the tag.
10. Non-slip socks are designed to provide better grip on surfaces and can be used during workouts or worn at home without footwear. However, caution is advised when using them on smooth surfaces. The manufacturer is not responsible for improper or irresponsible use of the product.
11. Non-binding socks lack a standard elastic band, making them ideal for people with swollen feet or diabetes-related issues. However, individuals sensitive to pressure should monitor their feet and discontinue use if undesirable swelling occurs.
12. Most of our socks feature a standard elastic band. If excessive pressure or swelling occurs, discontinue use immediately.
13. Socks without a non-slip layer should not be worn on smooth surfaces without footwear.
14. Socks from the food category closely resemble real food in most cases. However, they are not edible and should never be placed in the mouth. The same applies to products imitating popular beverages.
15. Beer socks are meant to surprise and amuse recipients, not to promote alcohol consumption. Due to the sensitive nature of this theme, we recommend offering this product only to adult consumers. For minors, we suggest choosing products inspired by non-alcoholic beverages.
16. Socks #standwithUkraine are not intended to impose political views but to provide support to those affected by the war in Ukraine.
17. Socks are flammable products and should be kept away from fire.
